Please remember the bike and equipment are your responsibility at all times. We supply a lock but this is not for locking the bike up outside at night. If the bike is **not** in a secure area, thieves **will** steal wheels, saddles etc. The bikes and equipment are rented for the use they were designed for, they are not for extreme off-road use, jumps or tricks or other types of extreme riding. The equipment must be in a secure, locked area inside a building when not in use. It is your responsibility to make sure you have this facility available before you book the equipment.
